STRENGTHENING AN INNOVATIVE SUSTAINABLE ECONOMY

2B-BLUE

Boosting the Blue Biotechnology community in the Mediterranean

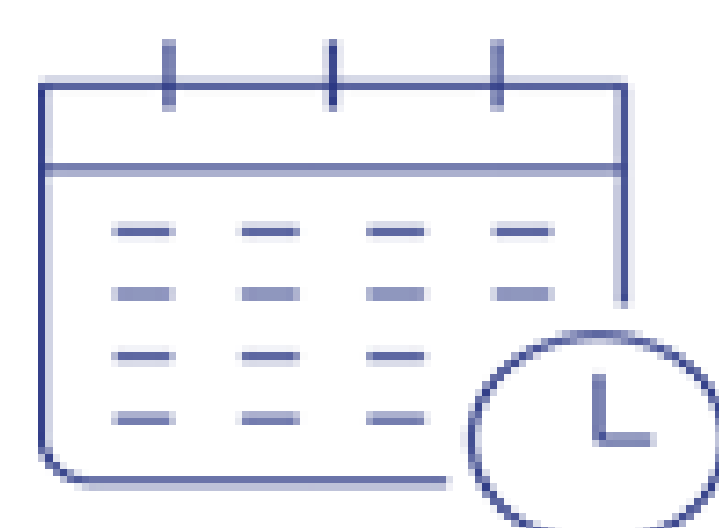

OUR PROJECT

Human health, food and energy security and environmental sustainability are challenges that require innovative solutions. Many of these can be found in the exploration and use of marine and freshwater resources, also known as blue biotechnologies. However, their development in Europe is still in its infancy.

2B-BLUE fosters innovation through 5 interactive Blue Biotechnology Hubs that facilitate collaboration, know-how transfer and innovation across the Mediterranean. The project supports public-private cooperation, training and scientific activities. Through its new Transfer Phase, 2B-BLUE will transfer and embed mature solutions and tools into new territories, promoting their adoption and ensuring that project results continue to generate impact beyond the testing phase.

Total budget
€ 3.7 mil.

Project duration
51 months

Interred Funds
€ 3.0 mil.
